PRISM Brain Mapping Tool

PRISM is used for Talent Management, Recruitment, Career Counselling, etc.

This is a sophisticated, online, neuroscience-based instrument specifically designed to identify the behavioural preferences that directly relate to personal relationships and work performance.

PRISM provides distinct profiles, or 'maps', of a person's behaviour: how he or she naturally prefers to behave; the extent to which he or she feels it necessary to modify that behaviour on occasions to achieve key objectives, and the overall pattern of behaviour that he or she tends to use for most of the time. Thereby improving the probability of 'RIGHT FIT' for the organisation

“Trust us with your compliances”

Under ‘Integrity + SAI KALP’, you get HR Solutions under one roof

We strongly believe in this dictum by Mahatma Gandhi, “Labour is priceless, not gold.”

Though not entered as an asset in your balance sheet, your “workforce shoulders your progress”

The Law of the Land must be followed whose ignorance is not an excuse.

Litigation and levies only hamper the business.

Lead your business to overall Prosperity and Peace of Mind
